Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.

Rugged Gentlemen will not answer all the questions that surface in our parenting. I do trust it to open the awareness of simple things, which when done daily, and with a hefty dose of love, will become a starting point to recreate a society determined to develop a healthy mentality of empathy as we learn to fight a growing society rife with self-centered, potentially narcissistic adults. I intend to build an awareness of what lies before us if we continue to turn our heads and to participate in developing a new attitude: proudly show we focus more on the kind of children we are leaving the world, than the world we seek to leave them.
