While this version features a

new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated. Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now

accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it

instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems

and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.

Egmont Childrens Books All OECD economies are undergoing rapid population ageing, leading to more age diversity in workplaces than ever before as people are not only living longer but working longer. This report presents a business case for embracing greater age diversity at the workplace and debunks several myths about generational differences in

work performance, attitudes and motivations towards work. *The Pre-Adamite Earth* Herb Yellin This volume examines the controversy surrounding the use of competition law to combat excessive pricing. While high or monopolistic pricing is not regarded as an antitrust violation in the US, employing abuse of dominance provisions in competition laws to fight excessive pricing has

gained popularity in some BRICS jurisdictions and a number of EU-member states in recent years. The book begins by discussing the economic arguments for and against the prohibition of excessive or unfair prices by firms with market power. It then presents various country studies, focusing on developed countries (such as the UK and Israel) and on the BRICS countries, to

highlight various practical challenges involved in recognizing excessive prices as abusive conduct on the part of dominant firms, including how to define, measure and identify excessive prices. The contributors also discuss other policy options that can be used to fight excessive prices in order to protect consumer welfare. Counseling Content

Religious icons have been a contested terrain across the world. Their implications and understanding travel further than the artistic or the aesthetic and inform contemporary preoccupations. This book traces the lives of religious sculptures beyond the moment of their creation. It lays bare their purpose

and evolution by contextualising them in their original architectural or ritual setting while also following their displacement. The work examines how these images may have moved during different spates of temple renovation and acquired new identities by being relocated either within sacred precincts or in private collections and museums, art markets or even

desecrated and lost. The book highlights contentious issues in Indian archaeology such as renegotiating identities of religious images, reuse and sharing of sacred space by adherents of different faiths, rebuilding of temples and consequent reinvention of these sites. The author also engages with postcolonial debates surrounding history writing and knowledge

creation in British India and how colonial archaeology, archival practices, official surveys and institutionalisation of museums has influenced the current understanding of religion, sacred space and religious icons. In doing so it bridges the historiographical divide between the ancient and the modern as well as socio-religious practices and their institutional memory and

preservation. Drawn from a wide-ranging and interdisciplinary study of religious sculptures, classical texts, colonial archival records, British travelogues, official correspondences and fieldwork, the book will interest scholars and researchers of history, archaeology, religion, art history, museums studies, South Asian studies and Buddhist studies.

Routledge Steenkamp introduces the global brand value chain and explains how brand equity factors into shareholder value. The book equips executives with techniques for developing strategy, organizing execution, and measuring results so that your brand will prosper globally. What sets strong global brands apart? First,

they generate more than half their revenue and most of their growth outside their home market. Secondly, their brand equity is responsible for a massive percentage of their firm's market value. Third, they operate as single brands everywhere on the planet. We find them in B2C and B2B industries, among large and small companies, and among established companies and new businesses.

The stewards of these brands have a set of skills and knowledge that sets them apart from the typical corporate marketer. So what's their secret? In a world that is globalizing, but not yet globalized, how do you build a powerful global brand that resonates universally but also accommodates local nuances? How do you ensure that it is dynamic and flexible enough to

change at market speed? World-class marketing expert Jan-Benedict Steenkamp has studied global brands for over 25 years on six continents. He has distilled their practices into eight tools that you can start using today. With case studies from around the world, Steenkamp's book is provocative and timely. *Global Brand Strategy* speaks to three types of B2C and B2B

managers: those who want to strengthen already strong global brands, those who want to launch their brands globally and get results, and those who need to revive their global brand and stop the bleeding.
