Finger tighten the plunger on the tensioner while turning the crankshaft by hand. At certain points during engine rotation you will feel the plunger tighten as it takes up the slack in the cam chain.

DO NOT force the plunger, continue steady finger tightening only to take up the slack in the chain as you rotate the crankshaft. 4.

To set the tensioner adjustment, rotate the engine forward while screwing the tensioner bolt in.

When you feel the engine tensioner parts (guide, rollers, etc.) make contact with the moving cam chain, back the tensioner bolt out 1/4 turn and tighten the jam nut.
